

■ Overview

RS-ES-350 Series switch supports fixed 24/48 port 10/100/1000M Base-T interfaces and 4 port 10G SFP+ uplink interfaces POE/POE+ models.

RS-ES-350 series switch is a high-performance stackable L3 Lite access routing switch developed by Rubisec. It is applied in enterprise campus network and easy to deploy Layer2/3 switching solution that offers enhanced security and 10GE uplinks, Static Route, L2 Multicast, RST/M-LAG stacking enabled and flexible management like SDN management and Cloud managed. The RS-ES-350 series switch can be used as access devices on enterprise branch networks. The switches help build highly reliable enterprise campus networks that are easy to expand and manage.

RS-ES-350 series switch offers advanced redundancy and reliability features, catering to diverse networking requirements. In addition to supporting traditional spanning tree protocols such as STP, RSTP, and MSTP, the switch also complies with the ITU-T G.8032 international standard. This Ethernet Ring Protection Switching (ERPS) protocol enables rapid 50ms failover within Ethernet ring network topologies, ensuring seamless connectivity and minimal downtime.

RS-ES-350 series switch offers a comprehensive suite of security features, including user authentication, port security, ACLs, loopback detection, and 802.1X authentication. It also incorporates IP Source Guard, DHCP/ND Snooping, Host Guard, Dynamic ARP Inspection, and PPPoE+ security mechanisms. These robust security functions ensure user access and network protection.

Additionally, the switch supports MAC+IP+VLAN binding, 802.1X authentication, and countermeasures against network storm, DOS/DDOS, ARP, and protocol packet attacks. This makes the RS-ES-350 series ideal for large-scale, multi-service, and complex-traffic networks.
